## FUND MANDATE

- The mandate of the Proof Capital Alternative Growth Fund is to invest primarily in alternative equity and direct investment opportunities with both superior expected returns and lower expected volatility relative to traditional public markets.
- Permitted investment vehicles include real property and/or securities invested in real property, REITs, private equity investments, bonds offering the prospect of capital appreciation, and other growth orientated securities.

## INVESTMENT PHILOSOPHY

### Access to Alternative Asset Classes

Through the Proof Capital Family of Funds, Proof offers families access to alternative asset classes that can offer both higher return potential and lower expected volatility relative to traditional public markets. Until now, we believe limitations on private wealth has prevented families from capturing the full benefit of private investments in alternative assets.

| 1 |

#### LESS-EFFICIENT MARKETS

Challenged access-to-capital can create special situations in which assets are worth more than companies. Proof Funds exploit market inefficiencies that create such opportunities.

| 2 |

#### LIQUIDITY IS OVERPRICED

Quality, less-liquid long term investments can be very rewarding. Proof Funds focus on long term investments, but are still able to offer investors monthly liquidity.

| 3 |

#### HIGH-QUALITY INTERNAL DEAL FLOW

Proof leverages high quality internal deal flow focused on private, event-driven special situations.

| 4 |

#### REAL DIVERSIFICATION

Real diversification is best achieved by investments in tangible alternative assets that have low correlations to the public markets.
